Plan

16 July 2025   14:49

☑ **1. Business Idea & Validation**
- Solve a real problem.
- Check competition (what makes you different?).
- Talk to potential users/customers for feedback.

☐ **2. Name & Branding**
- Choose a unique, easy-to-remember name.
- Check domain availability and social media handles.
- Create a logo and brand color theme.

☐ **3. Company Registration**
- Decide structure: Sole Proprietor, Partnership, Pvt. Ltd., LLP, etc.
- Register on MCA (Ministry of Corporate Affairs - www.mca.gov.in)
- Apply for PAN, GST, bank account.

☐ **4. Legal & Compliance**
- Create basic contracts (MoU, NDAs if needed).
- Comply with tax, labor, and industry-specific laws.

☐ **5. Website & Online Presence**
- Get a professional website (I can help you with this).
- Create social media pages.
- Build a landing page to capture leads or showcase services.

☐ **6. Launch & Marketing**
- Soft launch to close network.
- Use SEO, Instagram, LinkedIn, YouTube, Google Ads, etc.
- Start collecting feedback early.

☐ **7. Build a Team**
- Hire freelancers or interns initially.
- Use tools like Slack, Notion, ClickUp, etc. to manage workflow.

☐ **8. Scale Slowly**
- Start lean, validate services/products.
- Reinvest profits into growth.
- Partner with other startups or creators.

✅ 1. Medicine Adherence (already included)
Problem: Patient dawa time se nahi leta.
Fix: Automated WhatsApp/calls + AI reminder + daily check-in system.

❌ 2. Patient Confusion After Doctor Visit
Problem: Doctor fast bolta hai, patient samajh nahi pata – dawa kaise leni hai, kya avoid karna hai.
Fix:
- Voice note ya AI summary patient ko WhatsApp par bhejna.
- Multilingual AI assistant: Hindi, Hinglish, Bengali, etc.

📄 3. No Digital Prescription Access
Problem: Paper prescription gum ho jata hai, ya patient doosre doctor ko nahi dikha pata.
Fix:
- Cloud-based prescription storage for each patient.
- QR code based access.

📉 4. No Tracking of Health Improvement or Side Effects
Problem: Patient ko problem ho rahi hai par doctor ko nahi pata chalta.
Fix:
- Daily AI chat check-in: "Tabiyat kaisi hai?"
- Option to report "symptoms" → alert doctor/hospital.

⏱ 5. No Follow-Up Appointment Reminder
Problem: Doctor ne follow-up bola tha 7 din baad, lekin patient bhool gaya.
Fix:
- Auto-reminder for follow-up dates via WhatsApp/IVR.

🔗 6. No Coordination with Family
Problem: Family members ko patient ki tabiyat ya progress ka idea nahi hota.
Fix:
- Option to add family member as secondary contact → unko bhi alert/message jaye.

🎬 7. Difficult for Patient to Explain Situation Remotely
Problem: Patient phone pe doctor ko nahi samjha pata kya ho raha hai.
Fix:
- Voice + image upload option (e.g., show swelling, rashes, etc.)
- AI can analyze + forward to doctor if serious.

💊 8. Duplicate Medication or Allergic Reaction Risk
Problem: Ek patient kai jagah dikhata hai aur same medicine dobara milti hai ya allergy ho jati hai.
Fix:
- Maintain a shared patient history → alert if allergic or duplicate medicine.

🛠 Bonus: Useful Add-On Features

Feature	Value
🛒 Medicine Refill Reminder	"Aapki dawa khatam ho rahi hai. Kya aap refill karna chahenge?"
📍 Nearby Pharmacy Locator	AI se suggest kare kaha milegi dawa
📈 Health Dashboard	Patient ke recovery data ka graph (visible to doctor + patient)
🎯 Diet/Exercise Tip Bot	AI assistant se daily ek health tip
📊 Hospital Readmission Alert	Patient ne 2nd time same problem report ki to doctor ko alert mile

Business Idea & Validation
Yes this Solve the Real Word Problem
Problem :
Jab koi hospital patient hospital mai doctor se milne aata hai fir Usse Apni Problem Batata hai then doctor Usse dawa deta hai or Petient Apne Ghr return aa jata hai then uske baad aachnak se uski tabhiyat karab ho jata hai oh sahi time par dawa le raha hai ki nahi ye kisi ko pata nahi hota .
Solution :
Ham ek Project banayege jaha Par Super Admin New Hospital add karega then add hone ke baad Hospital ke Acount ko uska access denge jo patient ko add kega then ek Doctor ko add karege fir doctor sara dawa add kar denga uske then
sare patient ko daily whatapp message and call karegi hamri team message automate jaayega o dawa liye ki nahi then usse ek ai assitance dnege jo usse guide karega

🏥 Business Concept:

💡 Problem:
Patients often forget or delay taking medicine after visiting a hospital. There's no way for hospitals/ doctors to track or ensure compliance. This can lead to worsening health and emergency situations.

🛠 Solution:
A hospital-connected platform that:
- Registers patients post-consultation.
- Let's doctors enter prescribed medicines.
- Sends **automated WhatsApp messages, IVR calls, or notifications** to remind patients to take medicine on time.
- Offers **AI-based virtual assistance** to guide them with questions like:
  - ○ "Ye dawa kab leni hai?"
  - ○ "Side effects kya hai?"
  - ○ "Mujhe chakkar aa raha hai – kya karun?"

👥 Stakeholders & Access
- **Super Admin**: Adds hospitals and controls platform access.
- **Hospital Admin**: Adds doctors and patients.
- **Doctor**: Adds prescriptions and care plans.
- **Patient**: Receives reminders, interacts with AI, can mark medicine taken.

🧩 Core Features

Feature	Description
🏢 Admin Panel	Super Admin can add/manage hospitals
🏥 Hospital Portal	Add patients and assign them to doctors
👨‍⚕️ Doctor Dashboard	Add prescriptions, set dosage schedule
⏱ Reminder System	Automated WhatsApp messages & voice calls
🤖 AI Assistant	Multilingual voice/text bot to assist patient
📊 Compliance Dashboard	Shows which patients are taking medicine regularly

🖥 Tech Stack Suggestion

Area	Tech Suggestion
Backend	Node.js / Django
Frontend	React / Next.js
Database	PostgreSQL / MongoDB
AI Assistant	Dialogflow / GPT API
WhatsApp & Calls	Twilio / Gupshup / Exotel
Hosting	AWS / Vercel / Firebase

💼 Business Model Ideas
- **Subscription from hospitals**
- **Pay-per-patient fee**
- **White-label SaaS**
- **Freemium for small clinics, paid plans for large hospitals**

Name & Branding
- CureIQ
- CareSync
- JeevanSetu
- TruHeal
- SehatRakshak
